

## How to make an engine driver's hat!

You will need the following materials:

Hat template  
Two strips of black card  
One strip of yellow card  
Glue and stapler  
Coloured pens and pencils

### Step 1

Each child will need a hat template, two stripes of black card and one strip of yellow card.

### Step 2

Use the two strips of black card to make the hat-band. Each child can add decoration first if they wish. Check it's the right size for their head, then fasten it in place with a stapler.

### Step 3

Glue the yellow strip to the front of the black hat shape and ask the children to add any other decoration to the hat shape.

### Step 4

Staple the black hat shape to the hat-band. Put the hat on and practise pretending to be a train driver- can you come up with some actions to show what a train driver does?
